*\*Please Note: The textbooks and tool costs are approximate. The cost may be higher or lower depending on where you purchase your tools and textbooks. Also, this price estimate is "high balled" and assumes a student will be living in a quad apartment with three other automotive students. We do have double and single dorms available if you choose to live there instead of the apartments. If you live in a single or double dorm, you'll be required to add the meal plan expenses (15 meals per week = \$600 or 19 meal per week = \$625) since there is not a kitchen available.*
